LeetCode: https://leetcode.com/u/_op_divyanshu/

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience building scalable backend systems using Java, Spring Boot (Spring Framework), Hibernate, and REST APIs. Proficient in layered architecture (Controller–Service–Repository) and deploying applications on AWS cloud infrastructure. Actively strengthening DSA skills in C++ and building real-world projects to prepare for backend engineering roles.

TECHNICAL SKILLS

Languages: Java 8 / Java 17 / Java 21 (Core, OOP, Collections, API Design), C++, SQL

Frameworks & APIs: Spring Boot 3.x, Spring Framework 6.x, Spring MVC, Spring Security, JDBC, JPA, Hibernate 6.x, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Microservices & Cloud: Spring Cloud, OpenFeign, Netflix Eureka, API Gateway, Microservices Architecture

AWS Cloud: EC2, S3, CloudFront, Route53, ALB, Auto Scaling, VPC, SNS

Tools & OS: Git, GitHub, Maven, Linux, VS Code, Spring Tool Suite (STS), Postman

PROJECTS

Book Management System & AWS Deployment — Spring Boot 3.x, Spring Security, Spring Framework 6.x, Hibernate 6.x, AWS EC2, JPA, MySQL

GitHub: [SpringBootBookManagement GitHub Repository](#) | Live: [Book Management System Live Website](#)

- Developed a full-stack Book Management System using Spring Boot 3.x, REST APIs, and MySQL with layered architecture (Controller–Service–Repository) improving maintainability and code organisation
- Built and tested 15+ REST APIs covering book management, user authentication, borrowing/returning operations, and admin workflows using Postman with proper HTTP status handling
- Integrated Spring Security for role-based authorization with separate Admin and User access; implemented secure signup/login with session-based access control and protected routes
- Implemented CRUD operations via Spring Data JPA and Hibernate 6.x; added Spring Validator form validation to reduce invalid inputs and improve data consistency
- Managed book availability and quantity updates dynamically during borrow and return operations; built Admin Dashboard for book/user management and User Dashboard for borrowing
- Deployed on AWS EC2 with Linux environment setup (Git clone, Maven build, app hosting); configured custom domain via Route53 for public access

Distributed Quiz Management System using Spring Microservices — Spring Boot, Spring Cloud, OpenFeign, Eureka, API Gateway, MySQL

GitHub: [Project Repository](#)

- Developed a microservices-based Quiz Management System using Spring Boot and Spring Cloud.
- Implemented independent Quiz and Question services with RESTful APIs and MySQL databases.
- Enabled inter-service communication using OpenFeign Client.
- Configured Netflix Eureka Service Registry for dynamic service discovery and client-side load balancing.

- Implemented API Gateway for centralized routing and unified access to multiple services.
- Built scalable backend architecture following distributed system principles.

EDUCATION

B.Tech in Electrical Engineering | *Delhi Technological University (DTU)*

Graduated: 2025

CERTIFICATIONS & ACHIEVEMENTS

- **GATE 2026 Qualified** — Computer Science & Information Technology (CS): one of India's most competitive national-level engineering exams

DSA & PROBLEM SOLVING

- LeetCode: Solved 135+ problems with consistent daily practice across Arrays, Strings, Linked Lists, and Recursion — focused on backend interview preparation
- Maintained 35+ day coding streak; solutions regularly pushed to GitHub for portfolio visibility

EXTRA-CURRICULAR

Mentor | *Desh Ka Mentor* — *Government of Delhi Initiative*

- Mentored 10+ students through 1-on-1 sessions on academics and career guidance
- Provided structured support improving student confidence and engagement
